

Smart Grid Research at Case Western Reserve University

7/28/2014

Mingguo Hong (洪明国)
Associate Professor
Electrical Engineering and
Computer Science

CASE SCHOOL
OF ENGINEERING

CASE WESTERN RESERVE
UNIVERSITY

Overview of the Current Research Work

Microgrids

- Microgrids involving mostly medium voltage networks
- Microgrids involving mostly low voltage networks

Data analytics

- Application of data-mining techniques to big data sets of smart meter data

Building-to-Grid Integration

- Microgrid applications to buildings and building clusters
- Energy efficiency and grid services

(Current projects funded by the Case Western Reserve University, the Medical Center Company and the Cleveland Foundation.)
